**My Portfolio website**

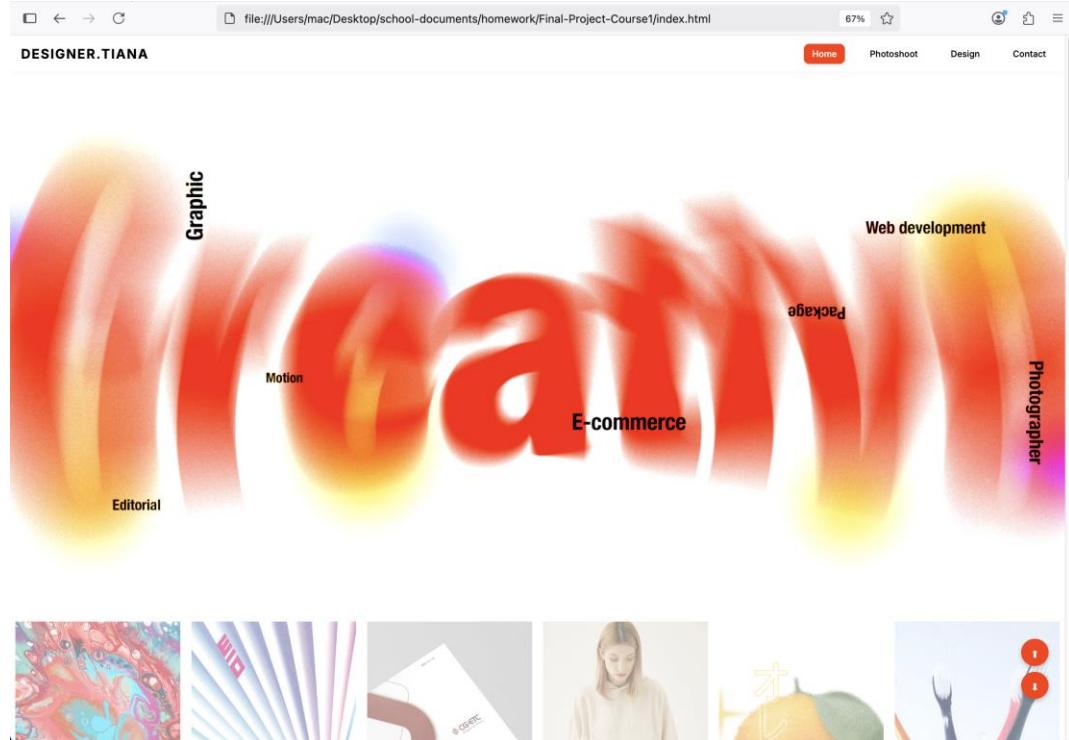

Static Website - Final Project  
**Tae jung - My Portfolio web**

**1 of 30: Showcase your Website**

Open your website on a browser,  
and answer these questions:

- a) What is your website about?
- b) What pages and content does it have?
- c) How do you navigate through your website?

# My Project

Static Website - Final Project  
**Tae jung - My Portfolio web**

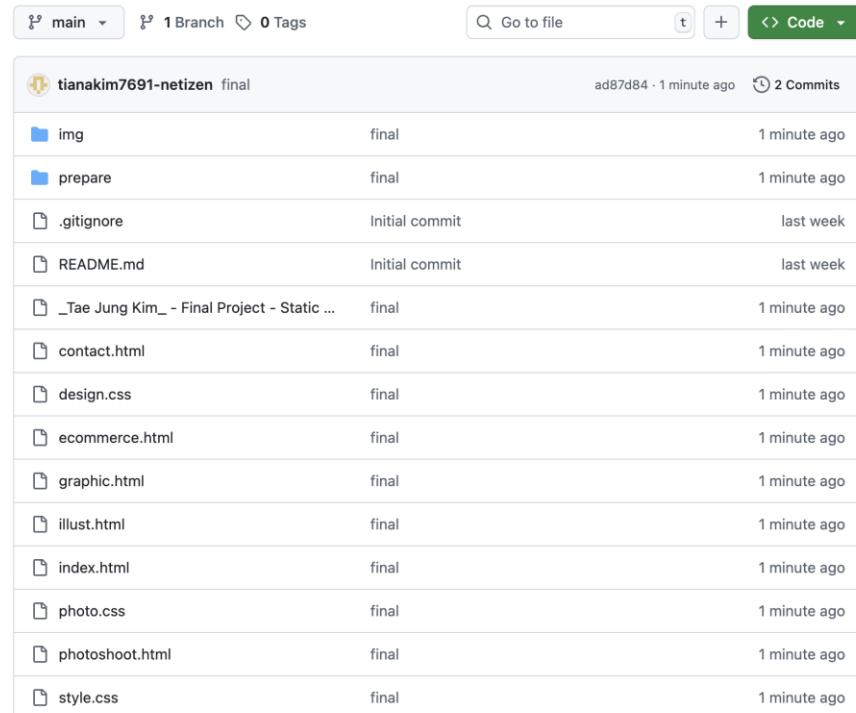

2 of 30: Share your GitHub repository

Answer these questions:

- a) Is your project on GitHub?
- b) How can a potential employer check it out? (clone)

# GitHub Repository

*<your GitHub repository link>*

A screenshot of a GitHub repository page. At the top, there are navigation buttons for 'main' (with a dropdown arrow), '1 Branch', '0 Tags', and a search bar with 'Go to file'. To the right of the search bar are three buttons: a magnifying glass, a plus sign, and a 'Code' button with a dropdown arrow. Below this header, the repository details are shown: owner 'tianakim7691-netizen', repository name 'final', commit hash 'ad87d84', and timestamp '1 minute ago'. A '2 Commits' badge is also present. The main content area displays a list of files with their commit history:

	tianakim7691-netizen final	ad87d84 · 1 minute ago	2 Commits
	img	final	1 minute ago
	prepare	final	1 minute ago
	.gitignore	Initial commit	last week
	README.md	Initial commit	last week
	_Tae Jung Kim_ - Final Project - Static ...	final	1 minute ago
	contact.html	final	1 minute ago
	design.css	final	1 minute ago
	ecommerce.html	final	1 minute ago
	graphic.html	final	1 minute ago
	illust.html	final	1 minute ago

3 of 30: Showcase how your Files are Organized

Answer these questions:

- a) Do you have an index.html at the root?
  - i) If it isn't at the root explain why.
- b) Do you have other HTML pages? Where?
- c) Do you have CSS files? Where?
- d) Where/how do you organize your assets?
- e) What other files do you have, if any?

# Project File Structure

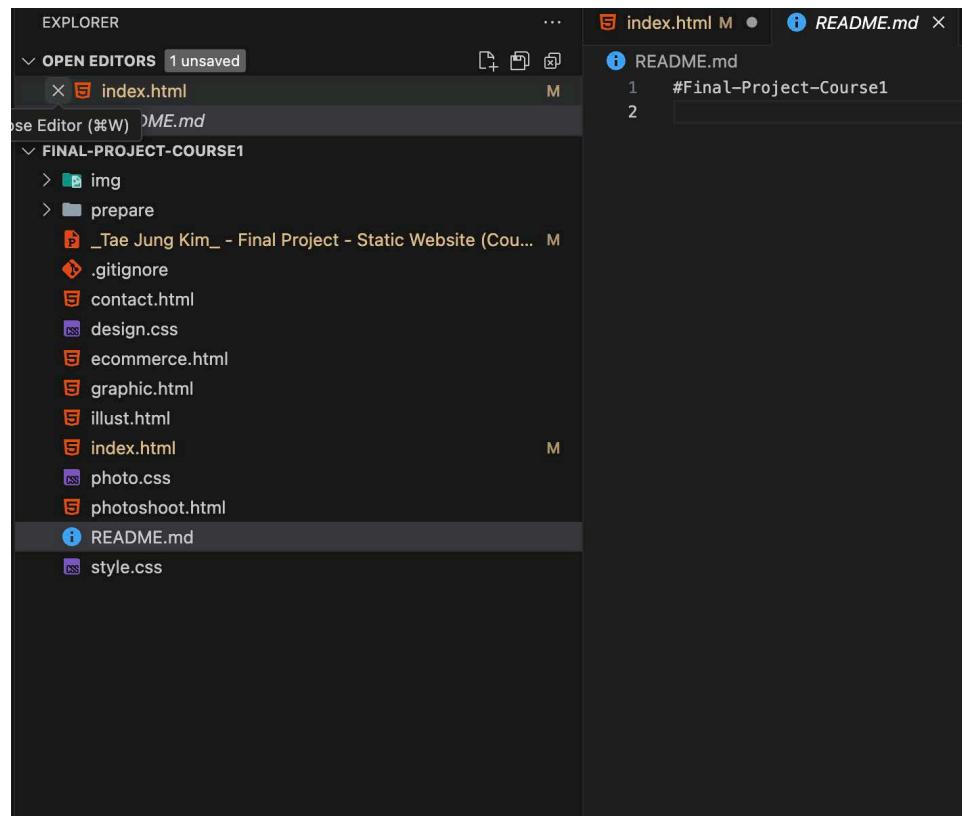

Static Website - Final Project  
**YTae jung - My Portfolio web**

**4 of 30: Showcase how you document with README file**

Answer these questions:

- a) Do you have a README.md file?
- b) Where is it in the project structure?
- c) What does it have?
  - i) Does it describe the project well?
  - ii) Does it indicate who the author(s) and contributor(s) of the project are?
  - iii) If necessary, does it include instructions for how to use or navigate your web project?
  - iv) Is the README file formatted well?

# README File

The screenshot shows a dark-themed code editor interface. On the left is the Explorer sidebar, which lists the project structure. It includes a folder named 'FINAL-PROJECT-COURSE1' containing 'img', 'prepare', and several HTML and CSS files: '\_Tae Jung Kim\_ - Final Project - Static Website (Cou...', '.gitignore', 'contact.html', 'design.css', 'ecommerce.html', 'graphic.html', 'illust.html', 'index.html', 'photo.css', 'photoshoot.html', 'README.md', and 'style.css'. The 'README.md' file is currently selected in the sidebar. On the right is the main editor area, which displays the content of the 'README.md' file. The file contains two lines of text: '#Final-Project-Course1' and '2'. The top status bar indicates there are 1 unsaved changes.

```
#Final-Project-Course1
2
```

# HTML5 Boilerplate

5 of 30: Showcase how you use HTML5 boilerplate

Answer these questions:

- a) Does your html have:
  - i) DOCTYPE
  - ii) lang attribute in <html>
  - iii) charset metadata
  - iv) viewport metadata
  - v) page title

```
!DOCTYPE html>

    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Tiana Portfolio</title>
    <link rel="stylesheet" href="style.css">
    <link href="https://fonts.googleapis.com/css2?family=Inter:wght@300;400;500;600;700&display=swap" rel="stylesheet" alt="inter-font">

```

6 of 30: Showcase landing page navigation

Answer these questions:

- Which page is the one that browsers will load initially?
- How do you handle navigation to other parts of the landing page, and/or to other pages in the website?

```
<body>
  <header class="header">
    <div class="container">
      <div class="logo" a href="index.html">DESIGNER.TIANA</div>
      <nav class="nav">
        <ul>
          <li><a href="index.html" class="active">Home</a></li>
          <li><a href="photoshoot.html">Photoshoot</a></li>
          <li class="dropdown">
            <a href="#">Design</a>
            <div class="dropdown-content">
              <a href="ecommerce.html">E-commerce</a>
              <a href="graphic.html">Graphic</a>
              <a href="illust.html">Illust</a>
            </div>
          </li>
          <li><a href="contact.html">Contact</a></li>
        </ul>
      </nav>
    </div>
  </header>
```

7 of 30: Showcase navigation between pages

# Multi-Page Navigation

Answer these questions:

- a) How do you handle navigation from other pages back to the home page?
- b) How do you handle navigation between pages (back-and-forth) in general?

```
<header class="header">
    <div class="container">
        <div class="logo" a href="#">index.html>DESIGNER.TIANA</div>
        <nav class="nav">
```

# Static Website - Final Project

## Tae jung - My Portfolio web

8 of 30: Showcase HTML structure

# General HTML Structure & Format

Answer these questions:

- a) How are your HTML elements nested?
  - i) Do you have a <header> section?
  - ii) If so, what is in it? If your <nav> is not in it explain why.
  - iii) Do you have a <main> section?
  - iv) If so, what is in it? If not, explain why.
  - v) Do you have other <sections>? Which?
  - vi) Do you have a <footer>?
  - vii) Do you have other section elements?
- b) Ensure there are no noticeable issues with how your HTML is structured and formatted.

```
<main>
  <section class="hero-section">
    <div class="hero-content">
    </div>
  </section>

  <section class="main-image-grid">
    <div class="image-row">
      <div class="image-item" href="ecommerce.html">
        
        <p>2020</p>
      </div>
      <div class="image-item" href="graphic.html">
        
        <p>2021</p>
      </div>
      <div class="image-item" href="illust.html">
        
        <p>2022</p>
      </div>
      <div class="image-item" href="photo.html">
        
        <p>2023</p>
      </div>
      <div class="image-item large" href="index.html">
        
        <p>2024</p>
      </div>
      <div class="image-item large" href="contact.html">
        
        <p>2025</p>
      </div>
    </div>
    <div class="horizontal-menu">
      <a href="ecommerce.html">E-commerce Design</a>
      <a href="graphic.html">Graphic Design</a>
      <a href="illust.html">Illust Design</a>
    </div>
  </section>
```

```
<footer class="footer">
  <div class="container">
    <nav class="nav">
      <ul>
        <li><a href="#" class="active">Home</a></li>
        <li><a href="photo.html">Photoshoot</a></li>
        <li><a href="ecommerce.html">Design</a></li>
        <li><a href="contact.html">Contact</a></li>
      </ul>
    </nav>
    <div class="footer-icons">
      <a href="https://www.behance.net" target="_blank"></a>
      <a href="https://www.instagram.com" target="_blank"></a>
      <a href="https://drive.google.com" target="_blank"></a>
    </div>
  </div>
</footer>
```

Static Website - Final Project  
**Tae jung - My Portfolio web**

9 of 30: Showcase use of HTML comments

Answer these questions:

- a) Did you use comment lines in your HTML?
- b) Give some examples of where, how and why.

```
|           </header>
|           <!-------start----->
|           <main>
```

```
|           <!-------first----->
|
|           <section class="text-and-arrow">
|             <div class="text-container">
```

```
<!-------second----->
```

```
<!-------footer----->
|           <footer class="footer">
|             <div class="container">
|               <nav class="nav">
|                 <ul>
```

# Inline CSS

10 of 30: Showcase inline CSS

Answer these questions:

- a) Can you show one example of inline styling?

*Add one or more screenshot(s) of  
inline CSS in your project,  
and remove this frame and text.*

Static Website - Final Project  
**Tae jung - My Portfolio web**

11 of 30: Showcase internal CSS

Answer these questions:

- a) Can you show one example of internal styling?

## Internal CSS

*Add one or more screenshot(s) of internal CSS in your project, \*make sure to show the `<style>` elements and where they are placed in the project, and remove this frame and text.*

Static Website - Final Project  
**Tae jung - My Portfolio web**

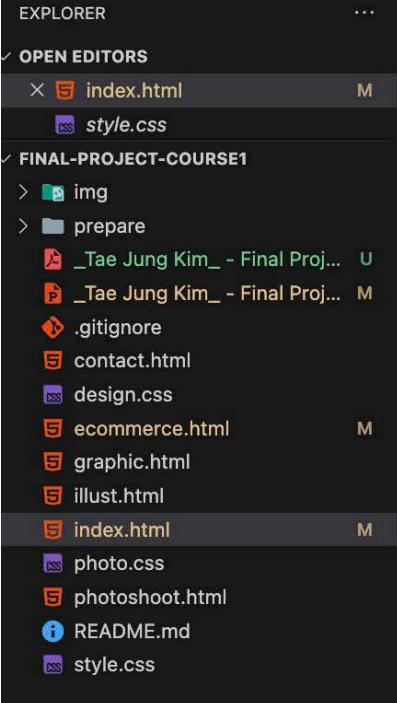

12 of 30: Showcase external CSS

Answer these questions:

- a) Did you use external styling in your project?

*Add a screenshot of your CS file in the VS Code explorer panel, and remove this frame and text.*

# External CSS

The screenshot shows the Visual Studio Code interface. The Explorer sidebar on the left lists files and folders: index.html (marked as modified), style.css, FINAL-PROJECT-COURSE1 (expanded to show img, prepare, .gitignore, contact.html, design.css, ecommerce.html, graphic.html, illust.html), index.html (marked as modified), photo.css, photoshoot.html, README.md, and style.css. The Editor pane on the right displays the content of index.html. The code includes a DOCTYPE declaration, HTML and head tags, meta tags for charset and viewport, a title, and links to style.css and Google Fonts. It also features a header with a container, logo, and navigation menu with dropdown items for Design and E-commerce.

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Tiana Portfolio</title>
    <link rel="stylesheet" href="style.css">
    <link href="https://fonts.googleapis.com/css2?family=Inter:wght@400;700;900&display=swap" rel="stylesheet">
</head>
<body>
    <header class="header">
        <div class="container">
            <div class="logo" a href="#">index.html>DESIGNER.TIANA
            <nav class="nav">
                <ul>
                    <li><a href="index.html" class="active">Home</a>
                    <li><a href="photoshoot.html">Photoshoot</a>
                    <li class="dropdown">
                        <a href="#">Design</a>
                        <div class="dropdown-content">
                            <a href="ecommerce.html">E-commerce</a>
                            <a href="graphic.html">Graphic</a>
                        </div>
                    </li>
                </ul>
            </nav>
        </div>
    </header>
    <main class="content">
        <div class="container">
            <h1>DESIGNER.TIANA</h1>
            <p>Portfolio of Tae Jung Kim</p>
            
            <div class="grid">
                <div class="item">
                    
                    <div>
                        <h2>Photo Shoot</h2>
                        <p>A collection of professional photos from various shoots.</p>
                    </div>
                </div>
                <div class="item">

13 of 30: Showcase block elements

Answer these questions:

- a) What is an example of an element with block display in your project?

Note: *Many elements have display block by default, so you do not need to explicitly give it in your CSS. Simply indicate an element in your project that has block display and why.*

```
}

.skill-item span {
    width: 80px;
    text-align: left;
    font-weight: 500;
    font-size: 1.1em;
    color: #000;
}

.bar-container {
    flex-grow: 1;
    background-color: #eee;
    height: 15px;
    border-radius: 7.5px;
    overflow: hidden;
}
```

Static Website - Final Project  
**Tae jung - My Portfolio web**

14 of 30: Showcase inline elements

Answer these questions:

- a) What is an example of an element with inline display in your project?

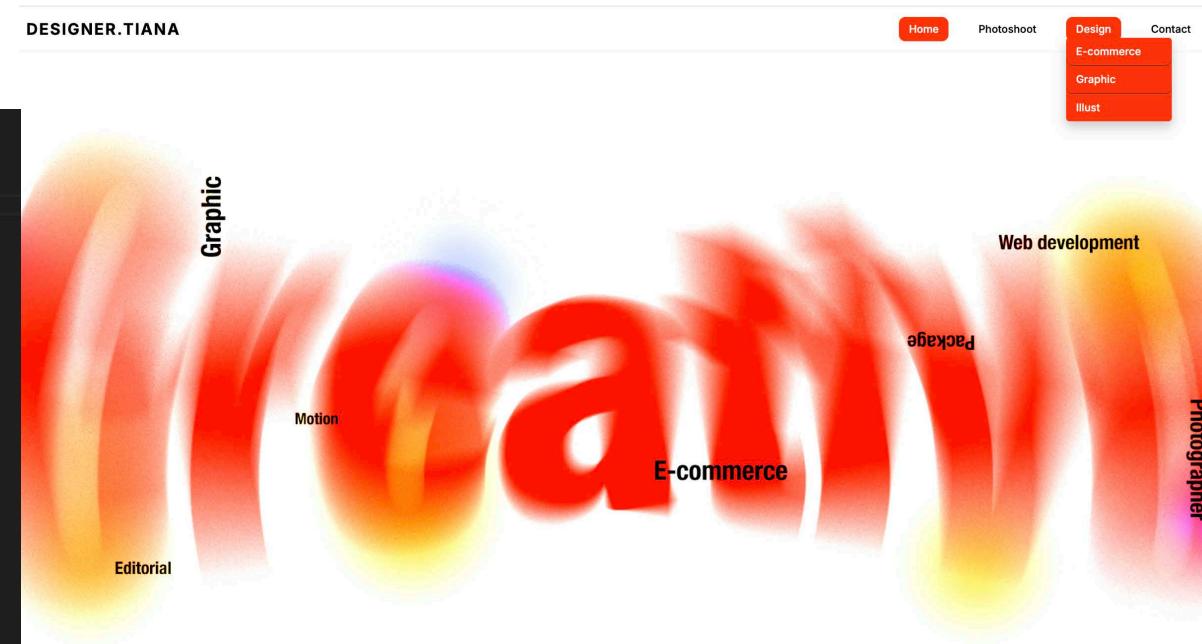

Note: *Many elements have display inline by default, so you do not need to explicitly give it in your CSS. Simply indicate an element in your project that has inline display and why.*

```
/* -----Dropdown Menu----- */
.dropdown {
    position: relative;
    display: inline-block;
    z-index: 10;
}

.dropdown-content {
    visibility: hidden;
    opacity: 0;
    position: absolute;
    background-color: #fff3600;
    min-width: 160px;
    box-shadow: 0px 8px 16px 0px rgba(0,0,0,0.2);
    z-index: 2;
    border-radius: 5px;
    overflow: hidden;
    top: 100%;
    left: 0;
}

.dropdown:hover .dropdown-content {
    visibility: visible;
    opacity: 1;
    transition-delay: 0s;
}
```

# CSS Inline Display

## 19 of 30: Showcase CSS Box Model

Answer these questions:

- a) Can you showcase how you utilize the Box Model for styling elements?
  - i) Did you use the box-sizing property?
  - ii) Does the element have margin?
  - iii) Does the element have border?
  - iv) Does the element have padding?
  - v) Does the element have width, height, or content?

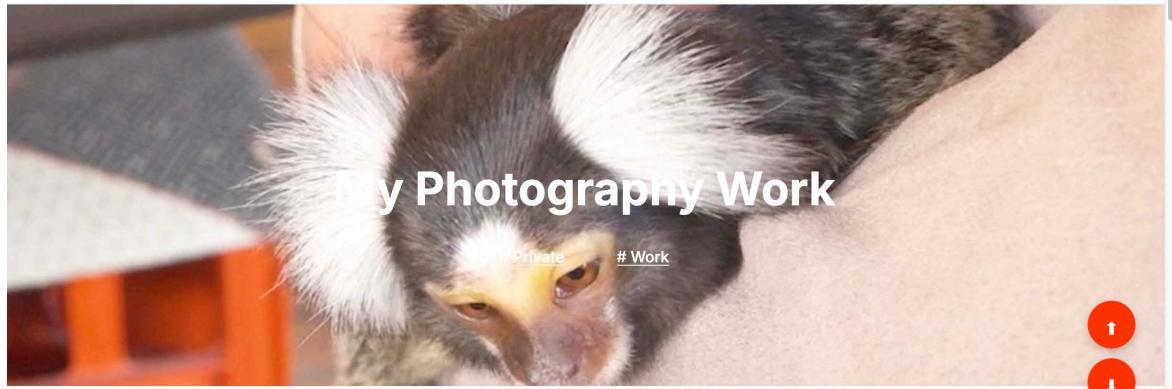

```
/* -----Gallery Section----- */  
  
/* Hero Section */  
.photoshoot-hero-section {  
    position: relative;  
    width: 100%;  
    height: 100vh;  
    overflow: hidden;  
    display: flex;  
    justify-content: center;  
    align-items: center;  
}  
  
.photoshoot-hero-section video {  
    position: absolute;  
    top: 50%;  
    left: 50%;  
    min-width: 100%;  
    min-height: 100%;  
    width: auto;  
    height: auto;  
    transform: translateX(-50%) translateY(-50%);  
    z-index: 1;  
    background-color: black;  
}  
  
.photoshoot-hero-section .overlay {  
    position: relative;  
    z-index: 2;  
    color: white;  
    text-align: center;  
    padding: 50px;  
    border-radius: 10px;  
}
```

23 of 30: Showcase Clear Property

Answer these questions:

- a) Can you showcase an example of the clear property?
- b) What elements are being cleared, and why?

*Add a screenshot of the CSS, and remove this frame and text.*

*Add a screenshot of the cleared elements as they appear on the website in the browser, and remove this frame and text.*

## 24 of 30: Showcase a Flexbox Container

Answer these questions:

- Can you showcase an example of an element with a display of Flex?
  - Did you use the justify-content property?
  - Did you use the align-items property?
  - Did you use the flex-wrap property?
  - Did you use the flex-direction property?
  - Did you use the gap property?
  - Did you use any other properties in the flex container? Which and why?

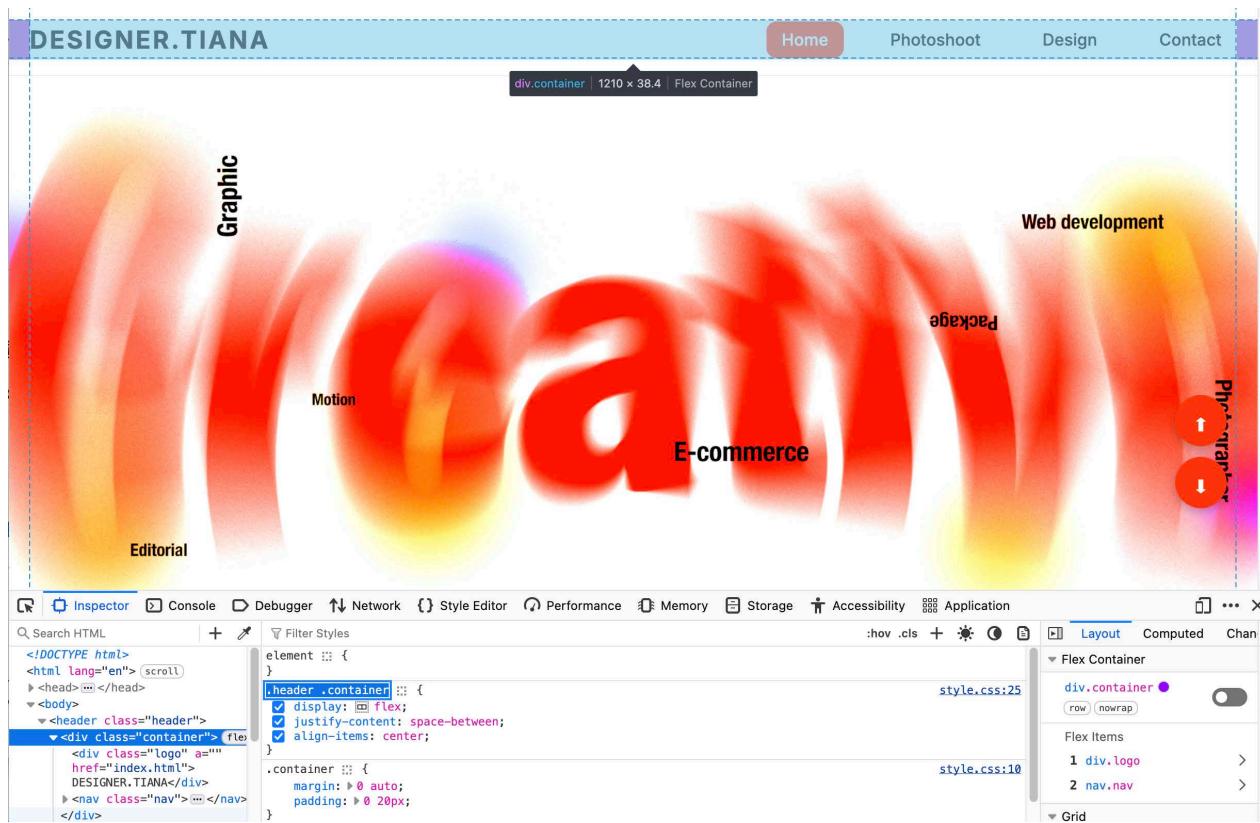

```
/* Header */
.header {
  background-color: #fff;
  color: #000;
  padding: 15px 0;
  border-bottom: 1px solid #eee;
  position: relative;
  z-index: 100;
}

.header .container {
  display: flex;
  justify-content: space-between;
  align-items: center;
}

.header .logo {
  font-size: 24px;
  font-weight: 700;
  letter-spacing: 2px;
}

.header .nav ul {
  list-style: none;
  margin: 0;
  padding: 0;
  display: flex;
  align-items: center;
}
```

25 of 30: Showcase Flexbox Items

Answer these questions:

- a) Can you showcase an example of two or more elements that are contained in a flexbox?
  - i) Did you use the flex properties?
  - ii) Did you use the align-self property?
  - iii) Did you use the order property?

# CSS Flexbox Items

```
.footer {  
    background-color: #c5c5c5;  
    color: #000;  
    padding: 40px 0;  
    border-top: 1px solid #eee;  
}  
  
.footer .container {  
    display: flex;  
    justify-content: space-between;  
    align-items: center;  
    flex-wrap: wrap;  
}  
  
.footer .nav ul {  
    list-style: none;  
    margin: 0;  
    padding: 0;  
    display: flex;  
    flex-wrap: wrap;  
}  
  
.footer .nav ul li {  
    margin-right: 20px;  
}  
  
.footer .nav ul li:last-child {  
    margin-right: 0;  
}
```

26 of 30: Showcase CSS Grid

Answer these questions:

- a) Can you showcase an example of an element with a display of grid?
- b) Did you use grid-template-columns?
- c) Did you use grid-template-rows?
- d) Did you use grid areas? Named or unnamed?
- e) Did you use gap property?
- f) Did you use any other grid properties?

```
/* Small Image Grid */
.small-image-grid {
  display: grid;
  grid-template-columns: repeat(3, 1fr);
  gap: 10px;
  padding: 10px 20px;
  background-color: #ffff;
}

.small-image-grid img {
  width: 100%;
  height: auto;
  display: block;
  object-fit: cover;
  aspect-ratio: 4 / 3;
}

/* Middle Image Grid */
.middle-image-grid {
  background-color: #ffff;
  padding: 20px 0;
  text-align: center;
}

.middle-image-grid .full-width-image {
  width: 100%;
  overflow: hidden;
}

.middle-image-grid .full-width-image img {
  width: 100%;
  height: auto;
  display: block;
}
```

27 of 30: Showcase use of Overflow

Answer these questions:

- a) Can you showcase an example of the overflow property?

```
/*----- Hero Section-----  
.hero-section {  
    position: relative;  
    height: 60vh;  
    display: flex;  
    flex-direction: column;  
    justify-content: center;  
    align-items: center;  
    text-align: center;  
    padding: 100px;  
    overflow: hidden;  
}
```

# CSS Overflow Property

The screenshot shows a static website portfolio for "DESIGNER.TIANA". The header includes a red "Home" button and links for "Photoshoot", "Design", and "Contact". The main content features a large, blurred background image of a person's face with the word "team" overlaid. Overlaid on the image are several circular icons with arrows pointing up and down, labeled "Graphic", "Motion", "Web development", "Package", "Photography", and "Photography". The browser's developer tools are open, specifically the "Inspector" tab, which displays the DOM structure and the CSS styles for the ".hero-section" element. The "Style Editor" panel shows the following CSS code for ".hero-section":

```
.hero-section {  
    position: relative;  
    height: 60vh;  
    display: flex;  
    flex-direction: column;  
    justify-content: center;  
    align-items: center;  
    text-align: center;  
    padding: 100px;  
    overflow: hidden;  
}
```

The "Layout" panel on the right indicates that the ".hero-section" element is a flex container with a column direction and nowrap wrap.

28 of 30: Showcase CSS Syntax & Format

Answer these questions:

- a) Does your CSS have proper indentation and white space usage?
- b) Are your CSS declarations organized in a good order without specificity conflicts?

```
/*-----[contact] Section Style-----*/
.contact-section {
    padding: 80px 20px;
    background-color: #f9f9f9;
    text-align: center;
}

.contact-section .contact-title {
    font-size: 3.5em;
    font-weight: 700;
    color: #ff3600;
    margin-bottom: 20px;
}

.contact-section .contact-description {
    font-size: 1.2em;
    color: #555;
    max-width: 600;
    margin: 0 auto 50px;
    line-height: 1.8;
}

.contact-form {
    max-width: 700px;
    margin: 0 auto 50px;
    background-color: #fff;
    padding: 40px;
    border-radius: 10px;
    box-shadow: 0 4px 15px rgba(0, 0, 0, 0.1);
    text-align: left;
}

.contact-form .form-group {
    margin-bottom: 25px;
}

.contact-form label {
    display: block;
    font-size: 1.1em;
    font-weight: 600;
    color: #333;
    margin-bottom: 10px;
}

.contact-section .contact-link {
    font-size: 1.1em;
    font-weight: 600;
    color: #333;
    margin-bottom: 10px;
}

.contact-section .contact-link a {
    color: #ff3600;
    text-decoration: none;
    font-weight: 500;
    transition: color 0.3s ease;
}

.contact-section .contact-link a:hover {
    text-decoration: underline;
}
```

29 of 30: Showcase CSS Comments

Answer these questions:

- a) Did you use comment lines in your CSS?
- b) Give some examples of where, how and why.

```
/* Skill bar widths */
.bar.ps { width: 90%; }
.bar.ai { width: 80%; }
.bar.id { width: 60%; }
.bar.pr { width: 80%; }
.bar.af { width: 50%; }
.bar.vs { width: 15%; }
.bar.figma { width: 10%; }
.bar.photo { width: 70%; }
```

```
.main-image-grid .image-item img:hover {
    opacity: 1; /* hover -->100% */
}
```

```
.bar {
    height: 100%;
    background-color: #ff3600;
    border-radius: 7.5px;
    width: 0;
    animation: fillBars 2s forwards; /* animation */
}
```

```
.footer-icons img:hover {
    transform: scale(1.1); /* hover bigger! */
}
```
